### **Oracle’s Textura Payment Management: Work Faster and More Efficiently**

What Is Textura (TPM®)?

Oracle’s TPM is an Internet-based construction invoicing and payment solution. With the TPM system, subcontractors (i.e. subcontractors, professionals, and vendors) can electronically sign and submit their pay applications—including invoices, sworn statements, and conditional and/or unconditional lien waivers. Payments are made electronically via ACH (Automated Clearing House) resulting in faster access to your funds. In addition, TPM facilitates submission and tracking of compliance documents and sub-tier lien waivers. In short, TPM has revolutionized the construction payment process. Thousands of subcontractors currently use TPM to submit their pay applications every month.

### **Sign Pay Applications and Submit Electronically**

TPM automatically generates the required Pay Application documents and transmits them to your General Contractor electronically at the click of a button.

- Invoices are created by simply entering the dollar value by Statement of Value line item.
- No percentage SOV line item draws are permitted. The SOV line item must be 100% complete to draw (invoice).
- Electronic submission of documents eliminates the expense and inconvenience of fax or hand delivery.
- Invoice amounts are verified with lien waiver and payment amounts, reducing the risk of error.

### **Receive Payments via ACH**

TPM uses the secure ACH network for electronic deposit of funds to accelerate draw payments.

- ACH will deliver funds faster than a manual check. Payments are made through TPM directly by the GC and are subject to the terms of your contract.
- ACH works like direct deposit. Funds are immediately available, no waiting for checks to clear.
- TPM alerts you via email that payment has been disbursed.

### **Know What is Happening, When It Happens**

TPM offers complete visibility throughout the draw process and notifies users of critical events.

- Receive real-time notifications when a draw is opened, change order issued, payment disbursed, etc.
- Receive email reminders to update expiring insurance documents and notification of non-compliance.
- Online invoice approval and rejection ensures that both parties are informed of final invoice amounts.

### **Manage Documents Online**

Project documents created in or uploaded to the system are available for viewing, printing or downloading to your computer. TPM will store these documents for a minimum of ten years.

- Pay Application backup documents are submitted quickly and easily via an upload attachment feature.
- Electronic submission & tracking of legal documents such as insurance certificates reduces payment holds.
- Possibility for lost or delayed documents resulting in held payments is virtually eliminated
